HEMANI INTERNATIONAL

SAFETY DATA SHEET

Prepared in accordance with the OSHA Hazard Communication Standard, 29 CFR 1910.1200 (GHS-aligned).

Product	**Hemani Sesame Oil 30mL**
Form No.	HI-SDS-007
Version	1.0
Issue date	September 2026
Supersedes	None — first issue
Next review due	September 2029

SECTION 1 — IDENTIFICATION

Product identifier (trade name): Hemani Sesame Oil 30mL

Other means of identification: EAN 8964000114179 · ASIN B00TX62RC6 · Net content 30 mL

Product form: Liquid

Recommended use: Cosmetic skin, hair and massage oil. **For external use only.**

Restrictions on use: Not for internal use. Not offered, sold or intended as a food.

Manufacturer:

Hemani International

Plot # 7, 15, 16 Sector BX, KEPZ Phase I, Landhi Industrial Area Extension, Mehran Highway, Karachi 75150, Pakistan

Under licence from:

Hemani Herbal LLC, Orlando, FL 32750, USA

Brand: Hemani

Telephone: +92 21 35080032-33 · **US:** +1 8444 HEMANI

Email: hemaniinternational@hemanitrading.ae

Emergency telephone: +1 8444 HEMANI (USA) · +92 21 35080032-33 (Pakistan)

Emergency telephone hours: USA: 9 AM - 5 PM EST Mon-Fri / Pakistan: 9 AM - 6 PM PST Mon-Sat

SECTION 2 — HAZARD(S) IDENTIFICATION

Regulation under which this classification was made:

OSHA Hazard Communication Standard, 29 CFR 1910.1200 (GHS-aligned).

The product is listed for sale in the United States and stored in the United States, so the US standard governs.

GHS classification: Not classified as a flammable liquid. The measured flash point of 255 °C, closed cup is above 93 °C, the upper limit of Category 4 under 29 CFR 1910.1200 Appendix B.6.

Signal word: None

Hazard statement: None

Pictogram: None

Precautionary statements: None required.

Hazards not otherwise classified (HNOC): None known.

Unknown acute toxicity:

SECTION 3 — COMPOSITION AND INFORMATION ON INGREDIENTS

Chemical name	INCI / common name	CAS No.	Concentration (% w/w)
Sesame seed oil (*Sesamum indicum*)	Sesamum Indicum Seed Oil	8008-74-0	100.0 %

Trade secret claims: None

SECTION 4 — FIRST-AID MEASURES

Inhalation: Not expected to be a route of exposure with this product. If vapour or mist is inhaled, move the person to fresh air. Seek medical attention if discomfort persists.

Skin contact: The product is intended for application to the skin. If irritation occurs, wash the area with soap and water and stop using the product. Seek medical attention if irritation persists.

Eye contact: Wash thoroughly with running tap water for at least 15 minutes, holding the eyelids open. Remove contact lenses if present and easy to do. Seek medical attention if irritation persists.

Ingestion: Do not induce vomiting. Rinse the mouth. Seek medical attention. Never give anything by mouth to an unconscious person.

Most important symptoms and effects, acute and delayed: May be mild skin or eye irritation is possible

Immediate medical attention and special treatment needed: Treat symptomatically. Show this safety data sheet to the attending physician.

SECTION 5 — FIRE-FIGHTING MEASURES

Suitable extinguishing media: Foam, carbon dioxide, dry chemical powder.

Unsuitable extinguishing media: Water — a water jet may spread the burning liquid. Water spray may be used to cool containers exposed to fire.

Specific hazards arising from the chemical: A combustible liquid. It may burn above its flash point. Combustion produces smoke and oxides of carbon.

Special protective equipment and precautions for fire-fighters: Wear self-contained breathing apparatus and full protective clothing, particularly in confined spaces.

SECTION 6 — ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures: No special precautions beyond normal handling. Remove ignition sources. Beware of a slip hazard on hard floors.

Methods and materials for containment and cleaning up: Absorb small spills with cloth, sawdust or another inert absorbent, then wash the area with water and a detergent. Pump larger spillages into a suitable container. Place used absorbent in a closed container for disposal.

Environmental precautions: Prevent entry into drains, sewers and watercourses.

SECTION 7 — HANDLING AND STORAGE

Precautions for safe handling: Keep containers sealed when not in use. Keep away from heat, sparks and open flames. Prevent spills and leaks to avoid a slip hazard.

Conditions for safe storage, including incompatibilities: Store out of direct sunlight in cool, dry conditions at a temperature not exceeding 25 °C, in the original closed container. Keep away from concentrated acids, alkalis and oxidising agents.

Shelf life: Store in a cool and dry place

SECTION 8 — EXPOSURE CONTROLS / PERSONAL PROTECTION

Occupational exposure limits: None established for any component by OSHA (PEL) or ACGIH (TLV)

Appropriate engineering controls: General ventilation is sufficient for normal handling and consumer use.

Individual protection measures:

- **Eye/face:** Safety glasses where splashing is possible during bulk handling. Not required for consumer use.
- **Skin/hand:** Not required for consumer use. Gloves for prolonged bulk handling.
- **Respiratory:** Not required.

SECTION 9 — PHYSICAL AND CHEMICAL PROPERTIES

Property	**Value**
Appearance	Viscous, clear yellow liquid
Odour	Odourless
Odour threshold	No data available
pH	Not applicable — the product is anhydrous
Melting point / freezing point	None
Initial boiling point and boiling range	No data available
Flash point	**255 °C, closed cup**
Evaporation rate	No data available
Upper / lower flammability limits	No data available
Vapour pressure	No data available
Vapour density	Greater than 1.0
Relative density	0.919 (relative density)
Solubility	Not soluble in water.
Partition coefficient n-octanol/water	No data available
Auto-ignition temperature	No data available
Decomposition temperature	No data available
Viscosity	No data available

SECTION 10 — STABILITY AND REACTIVITY

Reactivity: Not reactive under normal conditions of use.

Chemical stability: Stable under normal conditions.

Possibility of hazardous reactions: None under normal processing.

Conditions to avoid: High-temperature storage. Prolonged exposure to air and light.

Incompatible materials: Concentrated acids, alkalis and oxidising agents.

Hazardous decomposition products: None under normal conditions. In a fire, a complex mixture of irritating fumes, smoke and oxides of carbon is evolved.

SECTION 11 — TOXICOLOGICAL INFORMATION

Likely routes of exposure: Skin and eye contact. Ingestion and inhalation are not expected routes.

Symptoms related to physical, chemical and toxicological characteristics:

Exposure Symptoms by Route

- **Eye Contact:** May cause **mild mechanical irritation**, temporary redness, tearing, or blurred vision if direct contact occurs (similar to getting any standard cooking oil in the eyes).
- **Inhalation: No known significant effects** under normal handling. However, inhaling heavy mist, vapors, or aerosols from deeply overheated sesame oil may cause mild respiratory tract irritation or coughing.
- **Skin Contact: No known adverse effects** for normal topical contact. Prolonged or repeated industrial exposure to bulk oil may occasionally cause mild, temporary skin irritation or clogged pores in highly sensitive individuals.
- **Ingestion: Non-toxic via oral route**. Sesame oil is a common edible food product; however, ingesting massive industrial quantities may cause a mild laxative effect, upset stomach, or diarrhea.
- **Delayed, Immediate, and Chronic Effects**
- **Immediate Effects:** Mild mechanical eye watering or temporary coughing if exposed to a heavy, heated oil mist.
- **Delayed / Chronic Effects:** None expected. Sesame oil is **not** classified as a carcinogen, mutagen, reproductive toxin, or target organ toxin.

SECTION 12 — ECOLOGICAL INFORMATION

Ecotoxicity: No data available.

Persistence and degradability: Sesame oil is a readily biodegradable substance that exhibits a low potential for environmental persistence

Bioaccumulative potential: None expected.

Mobility in soil: Low.

Other adverse effects: None

SECTION 13 — DISPOSAL CONSIDERATIONS

Recover spilled product where possible. Dispose of surplus product and empty containers through an authorised waste-disposal or recycling facility, in accordance with local, state and federal regulations. Do not empty into drains or watercourses.

sesame oil is not classified as a hazardous waste under the federal Resource Conservation and Recovery Act (RCRA) regulations outlined in 40 CFR Part 261

SECTION 14 — TRANSPORT INFORMATION

UN number	**None — not regulated**
UN proper shipping name	Not regulated
Transport hazard class(es)	None
Packing group	Not applicable
Environmental hazards / marine pollutant	No
Transport in bulk (MARPOL Annex II / IBC Code)	Not applicable
Special precautions for user	Transport in closed, upright, secure containers

Stated for each mode: US DOT — not regulated. **IATA / ICAO (air)** — not regulated. **IMDG (sea)** — not regulated.

Basis: the measured flash point of 255 °C, closed cup is far above 60 °C, so the product is not a Class 3 flammable liquid under any of the three modes.

SECTION 15 — REGULATORY INFORMATION

United States — federal

- **OSHA Hazard Communication Standard, 29 CFR 1910.1200:** see Section 2.

TSCA: Sesame oil conforms to the requirements of the U.S. Toxic Substances Control Act (TSCA).

- **SARA 302 / 304 / 311 / 312 / 313:** no listed components.
- **CERCLA:** no listed components.
- **FDA:** the product is a cosmetic under the Federal Food, Drug, and Cosmetic Act. It is not a drug and no therapeutic claim is made for it.

United States — state

- **California Proposition 65:** pure sesame oil does not contain any ingredients or components on the California Proposition 65 list at a level that would require a consumer warning
- **State right-to-know:** no components on state right-to-know lists.

Other jurisdictions: not assessed. This sheet is prepared for the United States market.

SECTION 16 — OTHER INFORMATION

Date of preparation of this version: September 2026

Supersedes: None — first issue.

Changes in this version: prepared to the 16-section OSHA HCS order, with Hazard Identification at Section 2 and Composition at Section 3; the governing regulation named in the header and in Section 2; form number filled; the review date separated from the issue date.

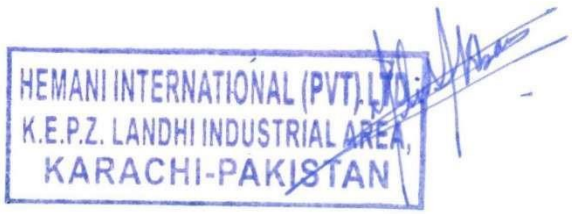

Abbreviations: CAS — Chemical Abstracts Service · GHS — Globally Harmonized System of Classification and Labelling of Chemicals · HCS — Hazard Communication Standard · OSHA — Occupational Safety and Health Administration · DOT — Department of Transportation · IATA — International Air Transport Association · IMDG — International Maritime Dangerous Goods Code · RCRA — Resource Conservation and Recovery Act · TSCA — Toxic Substances Control Act.
